PARENT PERMISSION FOR STUDENT TO PARTICIPATE IN ATHLETIC COMPETITION AND FOR THE PHYSICAL TO BE PERFORMED.
I hereby give consent for my child to receive a physical exam from a doctor for the purpose of completing in athletics at St. Joseph High School and also state, that to the best of my knowledge, my answers to the above questions are complete and correct. I hereby give my consent for my son/daughter to compete in athletic competition. In case this student is injured, the coaches are authorized to have him/her treated. I also understand and agree to adhere to the SJHS provisions in the Athletic Department Handbook.

This form must be returned to the Athletic Department prior to any practice and or play.

ETHICS IN SPORTS

I. Policy Statement

The Central Section, CIF is committed to the exhibition of sportsmanlike and ethical behaviors in and around all athletic contests. All contests must be safe, courteous, fair, controlled and orderly for all athletes and fans alike.

It is the intent of the CIF that violence, in any form, not be tolerated. In order to enforce this policy, the Central Section has established rules and regulations, which set forth the manner of enforcement and of this policy and the penalties incurred when violation of the policy occurs. The rules and regulations shall focus upon the responsibility of the coach to teach and demand high standards of conduct and to enforce the rules and regulations set forth by CIF.

The Central Section requires the following Code of Ethics be issued each year and requires signing by student athletes, parent/guardian and coaches prior to participation as a guide to govern their behavior.

II. Code of Ethics

- a. To emphasize the proper ideas of sportsmanship, ethical conduct and fair play.
- b. To eliminate all possibilities which tend to destroy the best values of the game.
- c. To stress the values derived from playing the game fairly.
- d. To show cordial courtesy to visiting teams and officials.
- e. To establish a happy relationship between visitors and hosts.
- f. To respect the integrity and judgment of sports officials.
- g. To achieve a thorough understanding and acceptance of the rules of the game and the standards of eligibility.
- h. To encourage leadership, use of initiative and good judgment by the players on a team.
- i. To recognize that the purpose of athletics is to promote the physical, mental, moral, social and emotional well-being of the individual players.
- j. To remember that an athletic contest is only a game, not a matter of life and death for player, coach, school, official, fan, or nation.

I have read and I understand the Policy Statement, the Code of Ethics and the violations and Minimum Penalties of the "Ethics in Sports" policy. I agree to abide by the policy and related consequences while participating in interscholastic athletics, regardless of context, site or jurisdiction.

What can happen if my child keeps on playing with a concussion or returns too soon?

Athletes with the signs and symptoms of concussion should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome) with devastating and even fatal consequences. It is well known that adolescent or teenage athlete will often under report symptoms of injuries. And concussions are no different. As a result, education of administrators, coaches, parents and students is the key for student-athlete's safety.

If you think your child has suffered a concussion

Any athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without medical clearance. Close observation of the athlete should continue for several hours. The new CIF Bylaw 313 now requires implementation of long and well-established return to play concussion guidelines that have been recommended for several years:

“A student-athlete who is suspected of sustaining a concussion or head injury in a practice or game shall be removed from competition at that time and for the remainder of the day.”

and

“A student-athlete who has been removed may not return to play until the athlete is evaluated by a licensed health care provider trained in the evaluation and management of concussion and received written clearance to return to play from that health care provider”.

You should also inform your child's coach if you think that your child may have a concussion Remember its better to miss one game than miss the whole season. And when in doubt, the athlete sits out.

For current and up-to-date information on concussions you can go to:

Keep Their Heart in the Game

Recognize the Warning Signs & Risk Factors of Sudden Cardiac Arrest (SCA)

Tell Your Coach and Consult Your Doctor if These Conditions are Present in Your Student-Athlete

Potential Indicators That SCA May Occur

- Fainting or seizure, especially during or right after exercise
- Fainting repeatedly or with excitement or startle
- Excessive shortness of breath during exercise
- Racing or fluttering heart palpitations or irregular heartbeat
- Repeated dizziness or lightheadedness
- Chest pain or discomfort with exercise
- Excessive, unexpected fatigue during or after exercise

Factors That Increase the Risk of SCA

- Family history of known heart abnormalities or sudden death before age 50
- Specific family history of Long QT Syndrome, Brugada Syndrome, Hypertrophic Cardiomyopathy, or Arrhythmogenic Right Ventricular Dysplasia (ARVD)
- Family members with unexplained fainting, seizures, drowning or near drowning or car accidents
- Known structural heart abnormality, repaired or unrepaired
- Use of drugs, such as cocaine, inhalants, "recreational" drugs, excessive energy drinks or performance-enhancing supplements

What is CIF doing to help protect student-athletes?

CIF amended its bylaws to include language that adds SCA training to coach certification and practice and game protocol that empowers coaches to remove from play a student-athlete who exhibits fainting—the number one warning sign of a potential heart condition. A student-athlete who has been removed from play after displaying signs or symptoms associated with SCA may not return to play until he or she is evaluated and cleared by a licensed health care provider. Parents, guardians and caregivers are urged to dialogue with student-athletes about their heart health and everyone associated with high school sports should be familiar with the cardiac chain of survival so they are prepared in the event of a cardiac emergency.

I have reviewed and understand the symptoms and warning signs of SCA and the new CIF protocol to incorporate SCA prevention strategies into my student's sports program.
